

WINE LIST

Our carefully chosen organic, natural
and biodynamic wines

All of our wines are produced in a more natural and sustainable way than conventional wines.

Natural, or living wine is wine as it was always made, before wine became a mass-market global commodity; made with the addition of chemical pesticides and herbicides, commercial yeasts and chemicals, including the infamous sulphites, to create safe, reliable wine that tastes the same year after year, bottle after bottle, despite fluctuations in weather and climate.

We're not here for 'safe and reliable' and we don't believe in bland. Instead we believe in real grapes and the wonderful wines they can produce when allowed to become an expression of the place - or '*terroir*' - in which they grow.

We focus on wines from grapes and winemakers that go their own way: viticulture that encourages biodiversity of soil and wildlife, with (at minimum) organic practices in the field. These wines we love are fermented using natural and indigenous yeasts and are lovingly crafted in the cellar with minimum intervention and much lower, or no, sulphites.

Nothing's perfect, winemaking done properly is a tough business. Our list is not dogmatic, it's a celebration of some of our favourite wines made by winemakers that we respect for their commitment to wine that is truly alive. Just like the wines inside the bottles our list will change and evolve with time, as we taste and learn more about these wild wines and the wild people that make them. We hope you enjoy those that we have discovered so far...

ORANGE + SKIN CONTACT WINES

NAS = No Added Sulphur, BM = Biodynamic Methods, SC = skin contact/orange, OX = oxidative V = volcanic, BIB = Bag In Box, TAP = on tap

White wine made more like red wine. Contact with the skins of the grapes creates a beautiful amber to orange colour with plenty of body and tannin. Real foodie wines to go with the bold flavours on our menu.
