

TAKE ME HOME WINE SHOP LIST

Our carefully chosen natural
and biodynamic wines

We pour wines which are natural and biodynamic, grown organically and produced in a more sustainable way than conventional wines.

Natural or real wine is wine as it was always made, before wine became a mass-market global commodity that is made with the addition of pesticides and herbicides, commercial yeasts and chemicals, including the infamous sulphites, to create uniform wine that tastes the same year after year, bottle after bottle, despite fluctuations in weather and climate.

Biodynamic farming is a big focus on this new list, with around half of our wines now farmed not just organically, but biodynamically. Contrary to what some say, this isn't just about burying cow horns. It's about giving back to the soil more than you take, regenerating the land, encouraging and restoring plant and animal biodiversity and working with the natural rhythm and cycle of nature. Vineyards are farms and, like all regenerative farmers, responsible viticulturists strive to be stewards of the soil, leaving it in a better shape than they found it.

Nothing's perfect, winemaking done properly is a tough business. Our list is not dogmatic, it's a celebration of some of our favourite wines made by winemakers that we respect for their commitment to wine that is truly alive. Just like the grapes inside the bottles, our list will change and evolve with time, as we taste and learn more about these wild wines and the wild people that make them.

We hope you enjoy those that we have discovered so far...

Kate and Ben

WHITE WINES including skin contact
