

St Leonards-on-Sea

WINE LIST

We pour wines which are made naturally, grown organically and produced in a more sustainable way than conventional wines.

Natural or real wine is wine as it was always made, before wine became a mass-market global commodity with the routine addition of pesticides and herbicides, commercial yeasts, chemicals and sulphites to create uniform wine that tastes the same year after year, bottle after bottle.

Biodynamic farming is a big focus on this list, with around half of our wines now farmed not just organically, but using some biodynamic methods, too. Contrary to what some say, this isn't just about burying cow horns. It's about giving back to the soil more than you take, regenerating the land, encouraging and restoring plant and animal biodiversity and working with the natural rhythm and cycle of nature. Vineyards are farms and, like all regenerative farmers, responsible wine makers strive to be stewards of the soil, leaving it in a better shape than they found it.

Nothing's perfect, winemaking done properly is a tough business. Our list is not dogmatic, it's a celebration of some of our favourite wines made by winemakers that we respect for their commitment to wine that is "genuine" and "alive".

Some are funky with cool labels to match, others are classic and elegant made by people who didn't give the label a second thought. Whatever the case, we believe they are made with integrity and passion, with care for the environment and with a minimal amount of intervention - otherwise they simply wouldn't be on our list.

Just like the grapes inside the bottles, this list will change and evolve with time as we discover more winemakers to showcase, we hope you enjoy those that we have discovered so far. **Kate and Ben**

*** please ask about vintages if not listed, it's easier that way as otherwise the list quickly becomes incorrect**
